

YOUR PATH TO INDEPENDENCE.

CLIENT STORY: TAMMY FISCHER

When Tammy Fischer picked up a copy of Edge Magazine years ago, she didn't realize she was about to be exposed to a little-known wellness therapy that would inspire her to embark on a new career. The magazine included an advertisement for colon hydrotherapy, a procedure that cleanses the colon with water. After trying the procedure, Tammy became a believer in the significant benefits it offers. She eventually took a part-time position providing the therapy to others. After more than four years juggling that with her full-time accounting job, Tammy decided it was time to pursue her passion and venture out on her own.

With that, Peaceful Waters Wellness Spa was born. Tammy opened her doors in April 2012. The spa offers a range of wellness solutions, including colon hydrotherapy, raindrop therapy, steam therapy, ion cleanse therapy, and massage services provided by a massage therapist who operates out of Peaceful Waters one day a week. Peaceful Waters is the only facility in Minnesota to offer the Angel of Water colonic system, and the response has been extremely positive, with many clients returning frequently to maintain the health benefits that Tammy's therapies help them achieve.

For Tammy, Peaceful Waters is not simply a way of providing for herself, it's a source of significant personal fulfillment. "These therapies make a huge difference for people, and it's really rewarding to see the results," she shared. "I like getting to know my clients, and I love knowing I'm helping to make their lives better by improving their overall wellness."

WomenVenture has helped Tammy realize her dream by providing financing for her business, and assisting her in developing a plan that set up her business for success from the very beginning. The services she received, combined with Tammy's accounting background, gave her the confidence she needed to establish Peaceful Waters. "WomenVenture has played a crucial role in my path to becoming an independent business owner," she said. "They forced me to think through many aspects of my company that I would not have known to consider on my own, and they continue to support me ongoing with any needs that arise during the course of doing business."
